

APPENDIX T

RADIOLOGICAL SAFETY

1. This appendix will be used to supplement the requirements and guidance prescribed by ER 385-1-80. It is applicable to all POD Districts.
2. Each District Commander will be responsible for assuring that the individual designated as the District Radiation Protection Officer (RPO) fulfills his responsibility by:
 - a. Coordinating all required licenses or authorizations with the Division Radiation Protection Officer, ATTN: CEPD-SO, prior to purchase, receipt, use, transfer, or disposal of radioactive material.
 - b. Providing the DIVRPO with an opportunity to review all applications for US Nuclear Regulation Committee license or OCE authorizations.
 - c. Providing the DIVRPO with copies of annual inspections conducted to assure compliance with the conditions of NRC licenses, or OCE authorizations.
 - d. Providing the DIVRPO with a current inventory of radioactive materials and registry of ionizing radiation producing devices within the geographical boundaries of the District.
 - e. Providing the DIVRPO with a current listing with names of the individuals designated by the District Commander as District Radiation Protection Officer, his alternate, and if required, the names of the individuals serving on the Radiation Protection Committee.
3. Each Personnel Radiation Exposure report required by para 8g of ER 385-1-80 will be forwarded through CEPD-SO to CEEC-SO prior to 1 March of each calendar year.
4. A copy of each physical inventory test report for storage areas, and each leak test of sealed sources, will be forwarded to CEPD-SO at least every six months.
5. The DIVRPO will be notified immediately by telephone of accidents, incidents, or losses involving radioactive materials.
